Quick Guide to Using Nokia Cellular Data Suite with Winfax Pro for Windows95 version 7

Installing and setting up

For installing the Delrina Winfax Pro for Windows95 (later called Winfax in this document) follow the instructions of the installation guide of the Winfax. After the installation restart your computer.

In **Setup**- menu → **Modem…** you can choose the right modem, choose the 'Nokia GSM Data-fax' from the list (figure 1). Other settings can be left to the default.

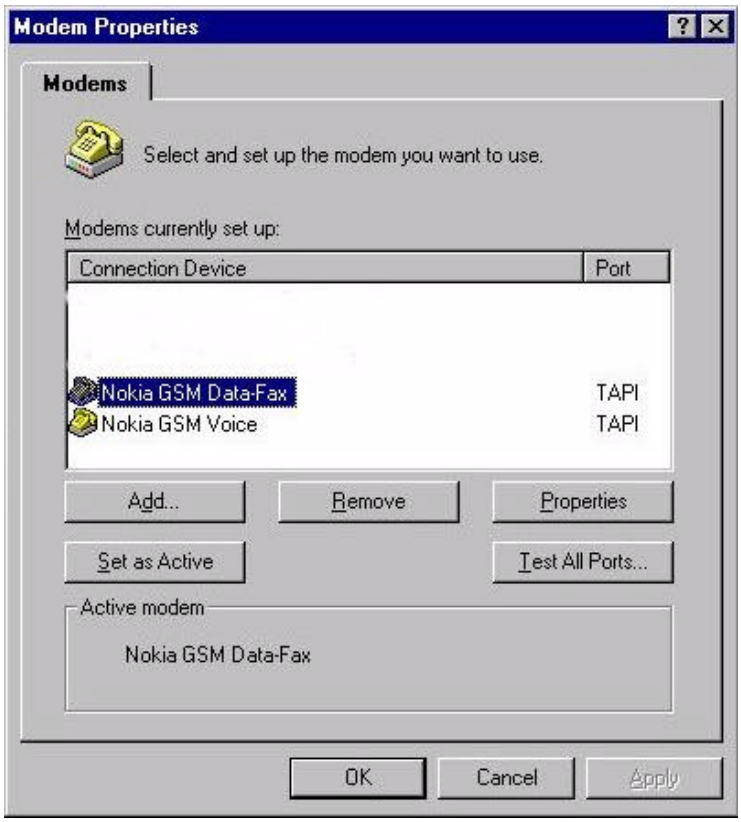

Figure 1. Modem properties...

When you push **Set as active** at the first time, the Winfax want to recognise the modem (figure 2).

CommSuite 95 Setup
Modem: Nokia GSM Data-Fax
To ensure reliable faxing, Setup must test and verify the fax modem you want to use. This is only required the first time you use the modem with WinFax.
Before continuing with the modem test:
1. Make sure the modem is connected to your computer and turned on.
2. Quit any programs that may be using the modem.
To continue, click Next.

Figure 3. Queering completed…

After queering the Winfax is ready to send faxes with Nokia Cellular Data Suite.

Sending / Making a connection

To send a fax click **Fax-** button or choose **New Fax…** from the **Send** menu. You get the following window (figure 4) to which you can type in the required information, e.g. the name and fax number of the recipient. If you want to send just a quick note, click the white area below **Cover Page** and write the note into it. When you have finished, click **Send** to send the fax.

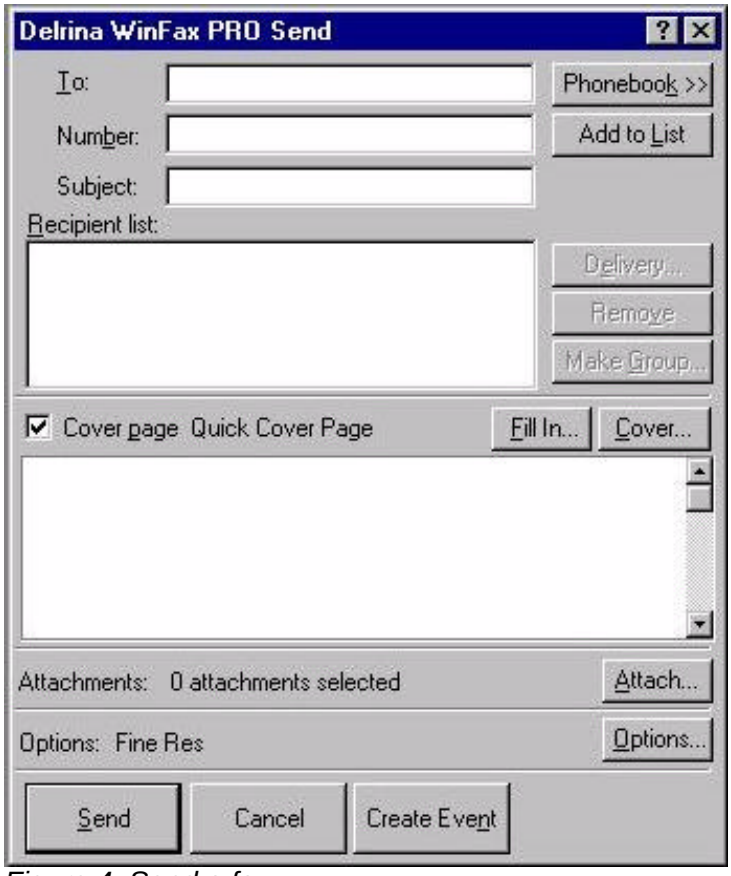

Figure 4. Send a fax

You can also send a fax directly from another application, such as Word for Windows, by choosing the printer as **WinFax on FAXMODEM** and after that just simply printing the document. After you have chosen Print at another application, Delrina WinFax PRO Send Dialog Box will open. Fill in the required information, at least the recipient fax number and click the **Send**, and your fax will be sent.

Receiving

You can use either automatic or manual fax receiving. For automatic receiving choose **Automatic Receive** in **Receive** menu. You can determine receiving settings in **Setup-Receive** menu (e.g. the number or the rings required before Winfax will answer an incoming fax call (figure 5). If you want to use manual receiving, choose **Manual Receive Now** in **Receive** menu when you get an incoming fax call.
